

hydroo[®]

NLF/NF SERIES

**Single Stage
End Suction Pump**

PRESENTATION

Hydroo Pump Industries SL is an enterprise specialised in the research, development and large-scale production of Stainless Steel centrifugal pumps. We have a vertical integration of the production processes, standing out stamping, welding and motor wiring in 6 value centers and production units. All of them with a high performance management on pump engineering and production quality.

HYDROO has set up a wide range of pumping solutions for many applications as building services, industry, irrigation and industrial process. Customers enjoy of the highest performance in booster sets and pressurization, fire-fighting sets, pumping of underground water, HVAC, drainage and sewage, utilities, desalination and OEM integrations. Versions in 50 Hz and 60 Hz are available, as well as any modification on materials, on request.

Global water challenges require excellence in pumping technologies

and close cooperation between pump designers, manufacturers and pump engineers. In order to better meet the customers' needs and requirements our company is facing an expansion of its operations worldwide, providing timely and effective services in more than 30 countries. With tight relationships in many regions, we're proud to introduce a new regional value center for Europe. We are based near Barcelona at the Girona industrial area. Hydroo is a trademark to forge excellent and successful business relationships with our value customers by means of an operative assembling unit and an application engineering unit. HYDROO trademark wants to symbolize the firm commitment for a high level service to our value partners.

At Hydroo we bet on a high level service to our value pump partners.

NLF NF

Single stage
end suction
centrifugal pump

Applications

Cooling water
Water supply/distribution
Drainage
Irrigation
General industrial services

Description

Back pull out design for fast and easy maintenance.

Performance range

Capacity: Q up to 800 m³/h

Head: H up to 160 m

Temperature: T up to 110 °C

Speed: n 2900/1450 rpm

Power: P up to 160 kW

Standard material

Casing: Cast iron

Impeller: Cast iron or bronze

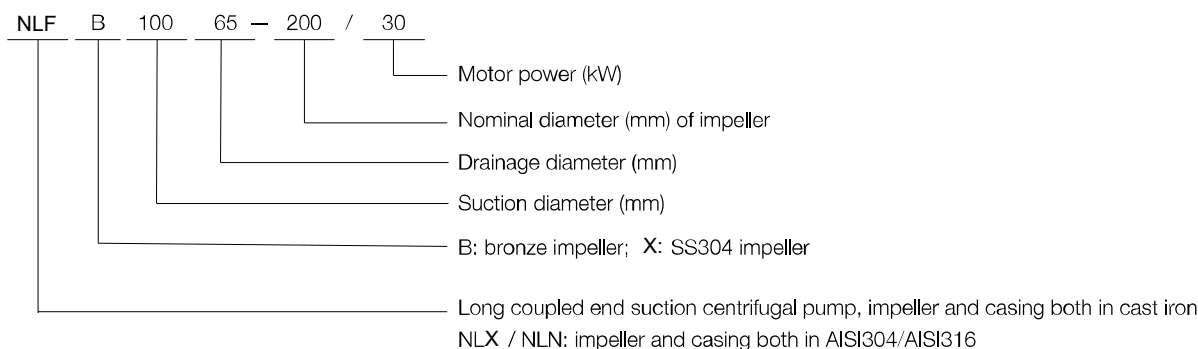

Shaft: Stainless steel

Performance scope

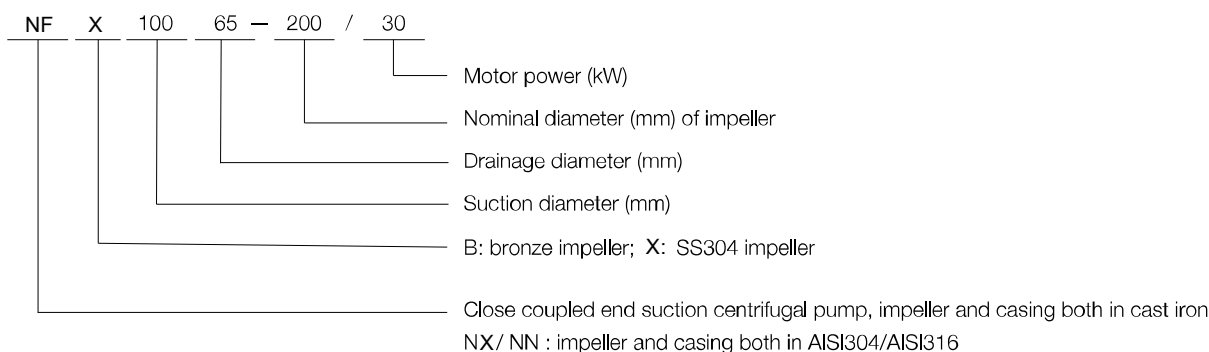

Definition of model

NLFB 100-65-200/30

NFX 100-65-200/30

Min inlet pressure

- Min inlet pressure depends on $NPSH+0.5m$ safety margin+gasified pressure. It should be re-calculated the inlet pressure of one of the following happens.
- The liquid is more warm.
- The flow exceeds the nominate value.
- Suction distance is very long or inlet pipe is very long.
- System pressure is too little.
- Inlet pressure is low, working pressure is low.

Typical application

- Clean, thin, non-corrosive, non-flammable or non-explosive liquid without grain or fiber.
- Water supply system
- Heat, air condition system
- Booster, constant pressure water supply
- Firefighting, splitting system
- Irrigating, farming
- Industry cooling, heater circulation system
- Industry transferring, drainage system

Construction

- Non-self-priming, single stage, single suction, horizontal, axial suction and radical discharge, pump body is fixed by base.
- NLF Pump use bearing cradle, which can orientate bearing, prevent from radical vibration, improve the rigidity of rotary part.
- NLF Pump use compacted shaft, use deep groove grease lubricated roller bearing.
- NLF Pump use connect pump and motor with semi-flexible coupling.
- Use standard wearable mechanical seal.
- TEFC motor, size complies to IEC standard.
- NLF Pump dimensions is conform to ISO 2858.
- NF, NX Pump are stub shaft.

Specification

- Flow: Max $800m^3/h$
- Head: Max 160m
- Working pressure: Max 16 bar
- Inlet pressure: Max 6 bar
- Power: Max 160kW
- Liquid temperature: $-15^{\circ}C \sim 110^{\circ}C$
- Inlet and Outlet diameter:
 - Inlet diameter: DN50~DN250
 - Outlet diameter: DN32 ~DN200

Curve conditions

- Curves tolerance is according to ISO9906, Annex A;
- All curves are based on the measured value of constant motor speed 2900 rpm, 2950rpm, 1450rpm or 1480rpm.
- The measurements were made with aireless water at temperature of $20^{\circ}C$. The curves apply to a kinematic viscosity of $1mm^2/s$ (1 cst)

Features

- Back-pull-out design, no need to disturb pump body and pipelines when servicing.
- All the NLF Pump models only use 4 kinds of pumps shafts and bearing cover, make parts exchangeable.
- Impeller is optimum design, inlet is enlarged, no whirlpool, deduct the water pump NPSH efficiently, wich makes pump work stable with little noise.
- NF, NX Pump are small, compact, easy to install.

Models 2 Pole

N°	Model	Q(m ³ /h)	H(m)	Motor (kW)	n(r/min)
