

hydroo®

HSC SERIES

Single Stage
Double Suction
Split Case pump

PRESENTATION

Hydroo Pump Industries SL is an enterprise specialised in the research, development and large-scale production of Stainless Steel centrifugal pumps. We have a vertical integration of the production processes, standing out stamping, welding and motor wiring in 6 value centers and production units. All of them with a high performance management on pump engineering and production quality.

HYDROO has set up a wide range of pumping solutions for many applications as building services, industry, irrigation and industrial process. Customers enjoy of the highest performance in booster sets and pressurization, fire-fighting sets, pumping of underground water, HVAC, drainage and sewage, utilities, desalination and OEM integrations. Versions in 50 Hz and 60 Hz are available, as well as any modification on materials, on request.

Global water challenges require excellence in pumping technologies

and close cooperation between pump designers, manufacturers and pump engineers. In order to better meet the customers' needs and requirements our company is facing an expansion of its operations worldwide, providing timely and effective services in more than 30 countries. With tight relationships in many regions, we're proud to introduce a new regional value center for Europe. We are based near Barcelona at the Girona industrial area. Hydroo is a trademark to forge excellent and successful business relationships with our value customers by means of an operative assembling unit and an application engineering unit. **HYDROO** trademark wants to symbolize the firm commitment for a high level service to our value partners.

At Hydroo we bet on a high level service to our value pump partners.

HSC

**Single stage
double suction
split case pump**

Applications

**Cooling water
Water supply/distribution
Fire protection
Metal manufacturing
Irrigation
General industrial services
Sea water**

Description

The casing is axially split, which permits removal of the complete rotor without moving either piping nor motor. Pumps generating high heads have double volutes to reduce radial forces. Replaceable wear ring protect the casing at the impeller running clearances. Flange drilled to ISO, DIN, BS or ANSI.

The closed double suction impeller gives practically zero axial forces. Each impeller is statically and dynamically balanced according to ISO1940.

Vertical or horizontal, soft packing or mechanical seal, grease or oil lubrication bearing on request.

Performance range

Capacity: Q up to 24000 m³/h

Head: H up to 200 m

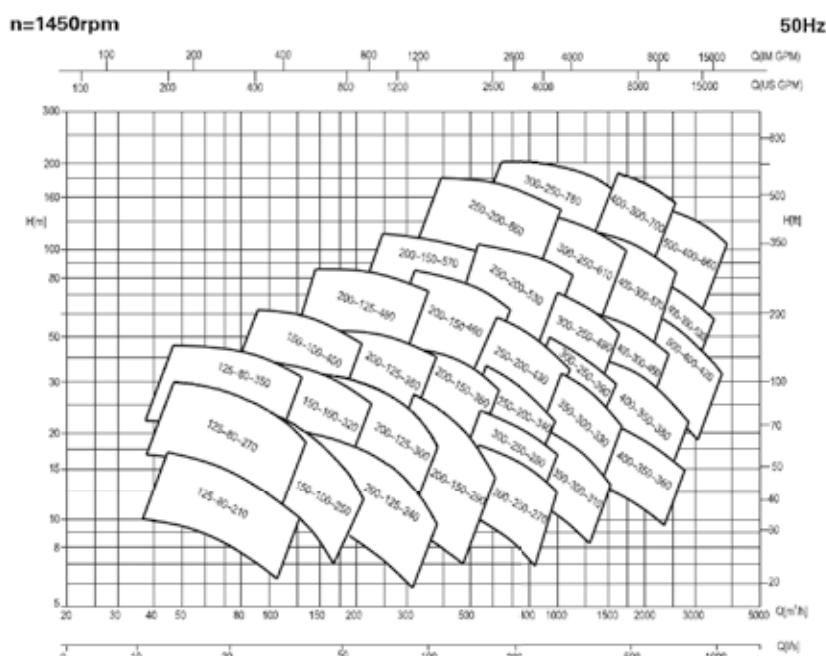

Temperature: T up to 105 °C

**Speed: n 2900/1450/980/740/580 rpm
3500/1750/1180/890/710 rpm**

Standard material

All pump parts can be made in any kind of materials on request: cast iron, bronze or special SS alloys.

Performance scope

For other performance curves, please contact our Application Engineering Department.

Brief Introduction

Applications

- Clean water or medium similar to water in Physical and chemical properties

Water supply	Drainage	Irrigation	Power station
Hydropower station	Fire-fighting	Air-conditioning	Building Industry
Marine applications	All kinds of water for industrial processes		

- Abrasive medium

Sand water	Oxide scale water	Others
------------	-------------------	--------

- Corrosive medium

Desalination	Bittern	Sea water	Others
--------------	---------	-----------	--------

- High temperature medium

Heating network circulating water	All kinds of chemical liquid
-----------------------------------	------------------------------

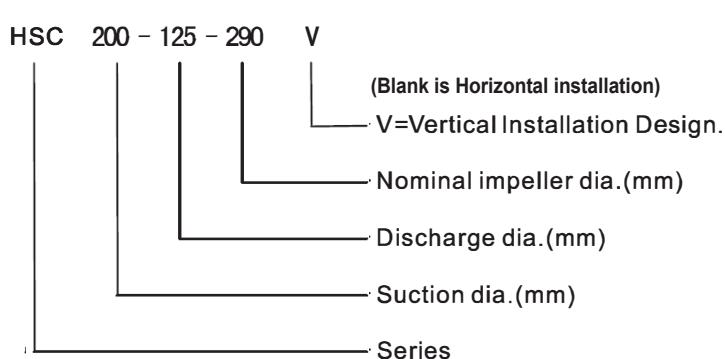

- Petroleum and chemical liquids (according to API610 BB1)

Crude oil and refined oil	Oil loading and unloading of oil terminal	All kinds of chemical liquid
---------------------------	---	------------------------------

Specification

Capacity	Q :50~20000m ³ /h
Head	H 10~230m
Suction Dia	DN: 100~1400mm
Discharge Dia	DN: 80~1200mm
Operating Pressure	P :≤5MPa
Operating Temperature	:-15°C~+ 200°C(Standard max.80°C, Optional for higher temperature)
Abrasive medium concentration:	≤4%

Designation

Structure Design

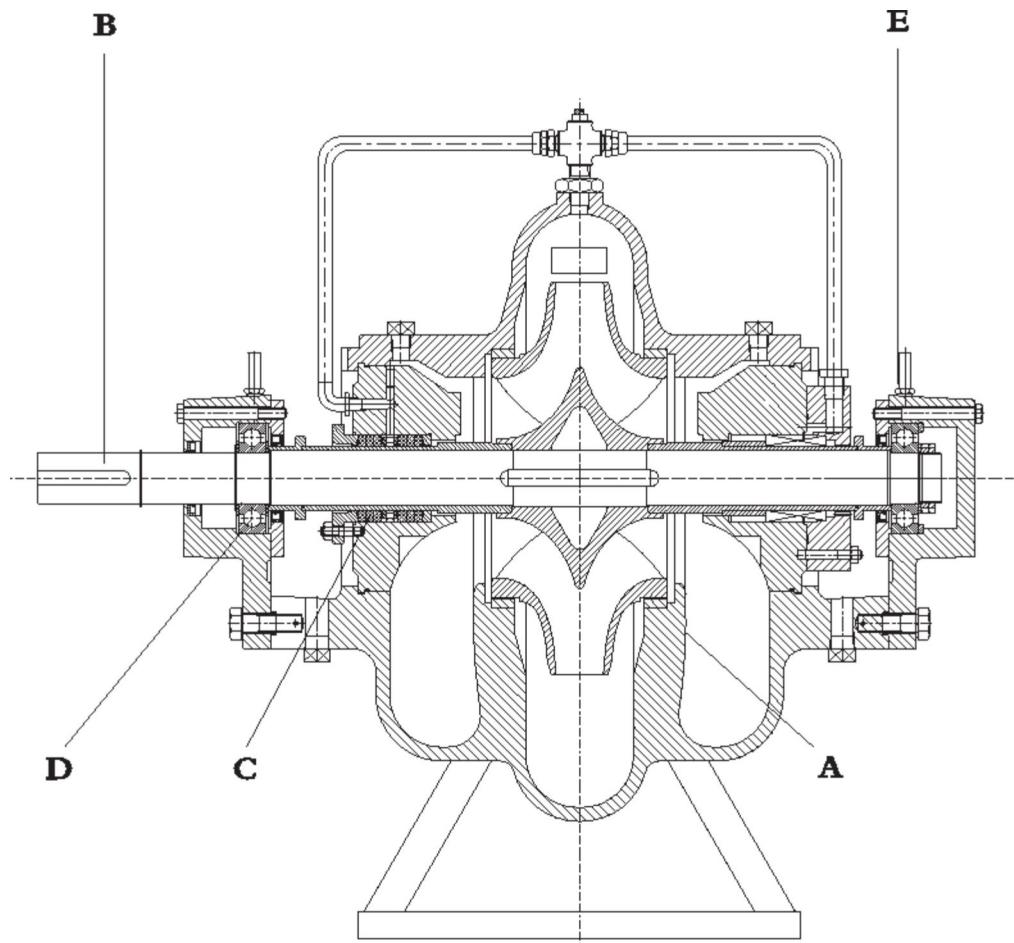

HSC is Single stage, axially split volute casing pump with double suction impeller, for horizontal and vertical installation. Drive shaft end of the horizontal pump optionally on the left or right side. Flanges drilled to GB, ISO, DIN, BS or ANSI.

Bearing

Horizontal: Grease lubricated ball bearings on both side, oil lubrication is optional. For the big size pump, sliding bearing is available.

Vertical: Grease lubricated ball bearings

Configuration Features

A. Casing

- a. In-line axially split design which permits removal of the complete rotor without moving the pipe and motor
- b. Short distance between bearings
- c. Leak-tight due to compact joint flange with long, prestressed bolts
- d. Counter-rotation possible with similar parts
- e. Double volute casing reduces radial forces on the impeller and consequently the bearing loads
- f. Easy mounting self-aligning upper casing
- g. Flange drilled to ISO, DIN, BS or ANSI
- h. Smooth surface inside and epoxy coating as required
- i. Replaceable wear rings protect the casing at the impeller running clearances
- j. Excellent efficiencies and outstanding NPSH improved by CFD
- k. Heavy duty casing design for high working pressure

B. Rotor parts

- a. Computer-optimized double entry impellers
- b. Minimal axial thrust due to double-entry impeller
- c. Impeller is statically and dynamically balanced according to ISO1940
- d. Optional impeller wear rings
- e. New vane passage with excellent hydraulic characteristics high-performance improved by CFD

C. Seal

- a. Asbestos-free, potable water quality softpacked stuffing boxes
- b. Unbalanced mechanical seal, according to DIN 24960 Balance mechanical seal for operating pressure >16 bar on required
- c. Cartridge-type mechanical seal on required

D. Bearing

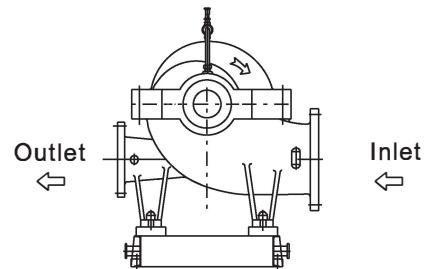

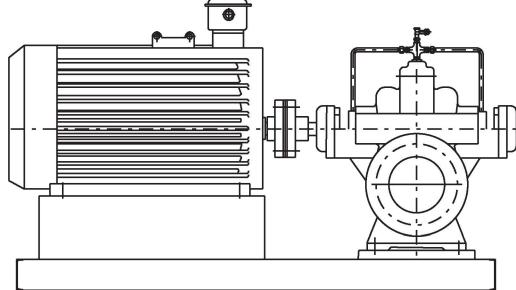

- a. SKF covered, sealed for life grease lubricated antifriction bearings for long service life
- b. Open gland, enough space for service activities
- c. Optional: oil lubrication with constant level oiler

E. Controlling & protection

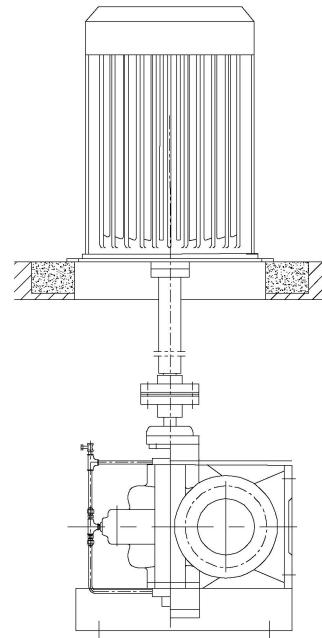

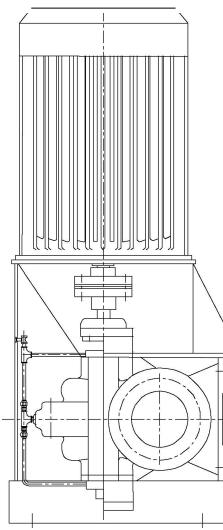

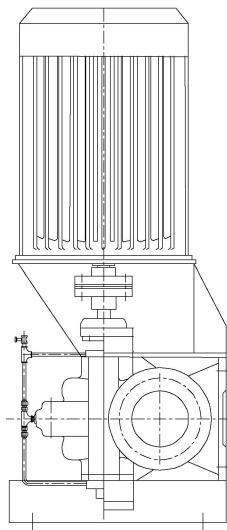

- a. Heavy duty shaft completely sealed and dry for zero corrosion
- b. Short and rigid with negligible vibrations
- c. Replaceable shaft protecting sleeves
- d. No threads exposed to pumped medium, long operating life and no corrosion
- e. Adjustment-free assembly
- f. Quick and easy assembly/dismantling of the rotor components due to elastically pre-stressed mountings
- g. Maximum interchangeability shafts design entire series for 2900rpm and 1450rpm model just six shafts and six bearings assemblies

Note:

Values are valid for casing materials cast iron, for casing material ductile cast iron use 1.4-fold value and for cast steel use 1.7-fold value. If require for the dimension of pump which is not shown in the above table, pls contact HYDROO.

Speeds

The Performance Range Chart shows the pump operating range, for higher speeds, pls consult HYDROO.

Vibrations

- 1.The normal operating range of pump is 0.4~1.25 times of rated capacity.
- 2.The vibration values of pump are according to ISO 2372-1974.

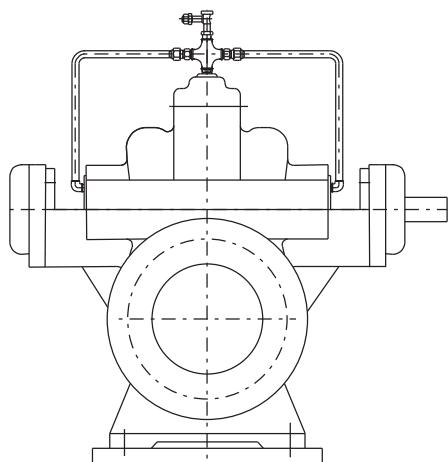

Paint Specifications

	Inside	Outside
Pre-treatment	Blasting (2 times)	
Primer coating	Epoxy zinc-rich primer	
Finish coating	Wet parts use the Interzone 954 or Epoxy zinc-rich primer	Acrylic Enamel Normal NSC: RAL 9005 (Black) Fire-Fighting Pump: RAL3000(Red)

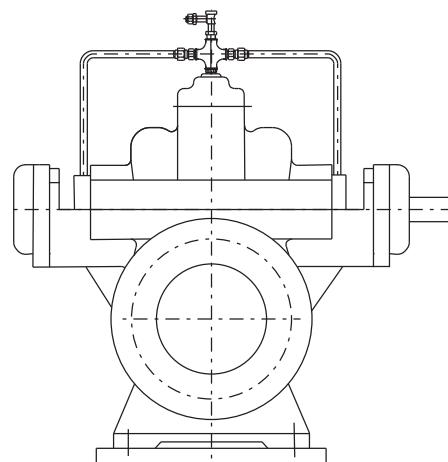

Note: Super light energy saving coating, wear-resistant coating, anti-corrosion coating and others are available according to the different medium, application, customer requirements and the coating is extra-charged.
